You should see -

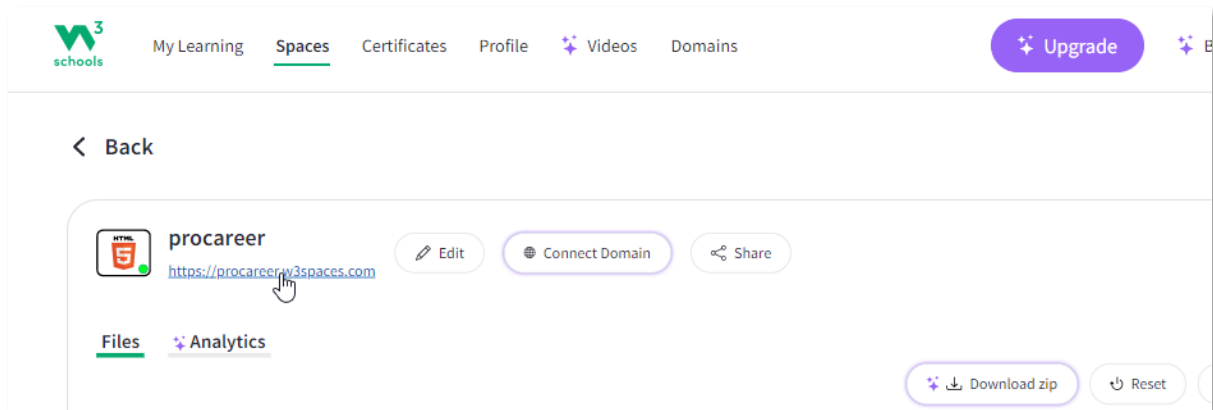

You should see this screen. Your space is now ready.

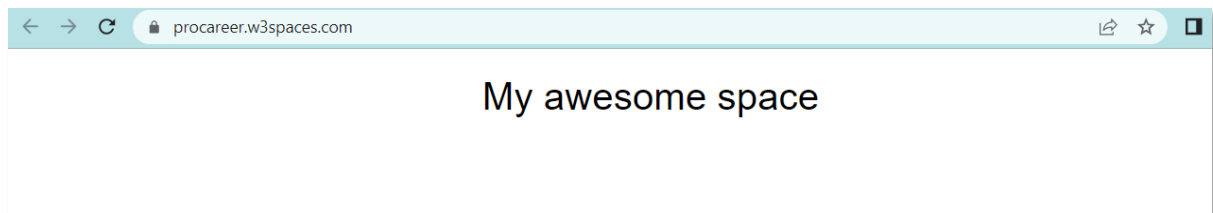

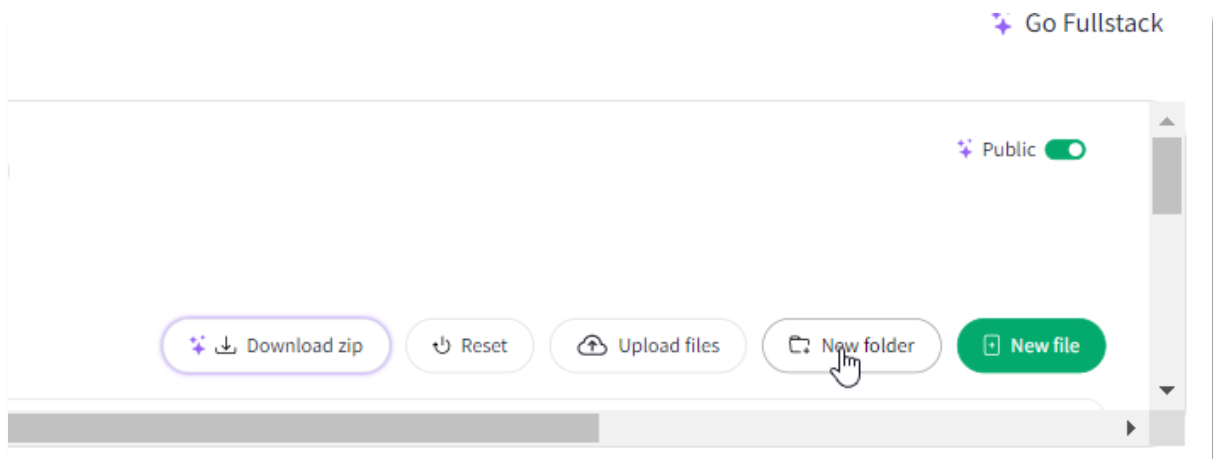

11. Click on the link to check the space out

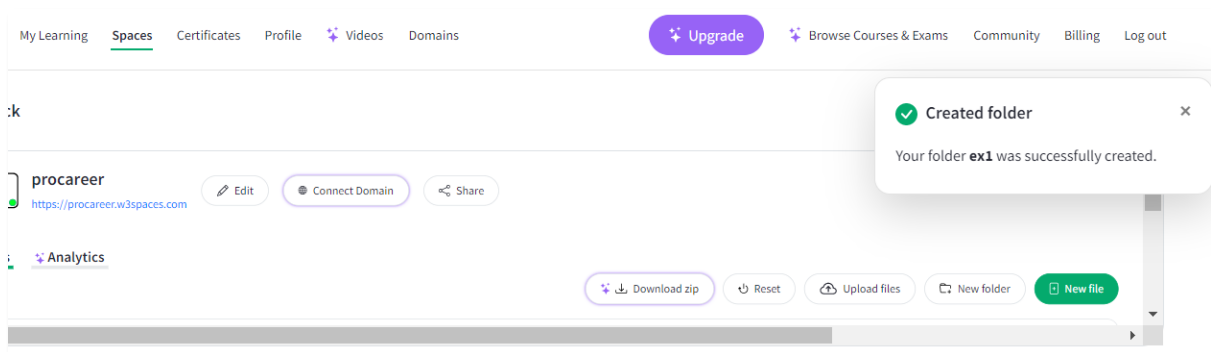

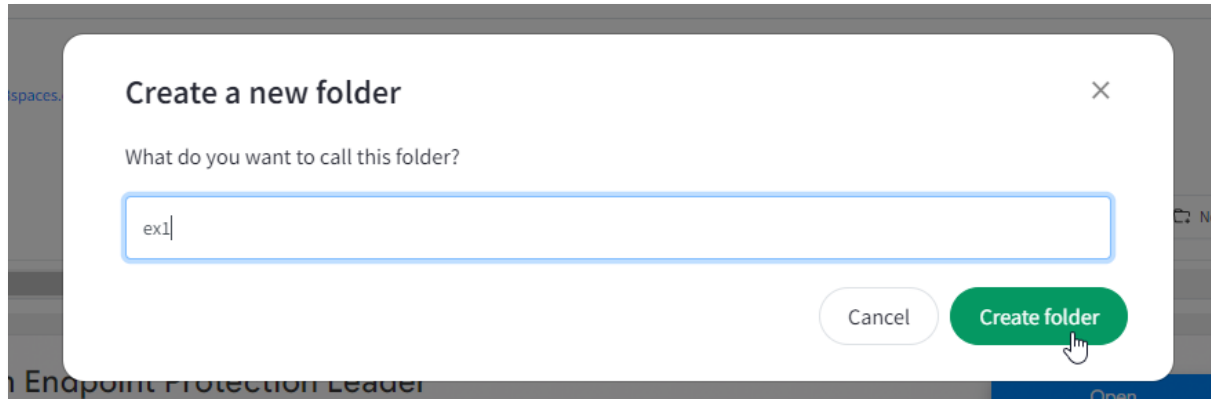

You should see

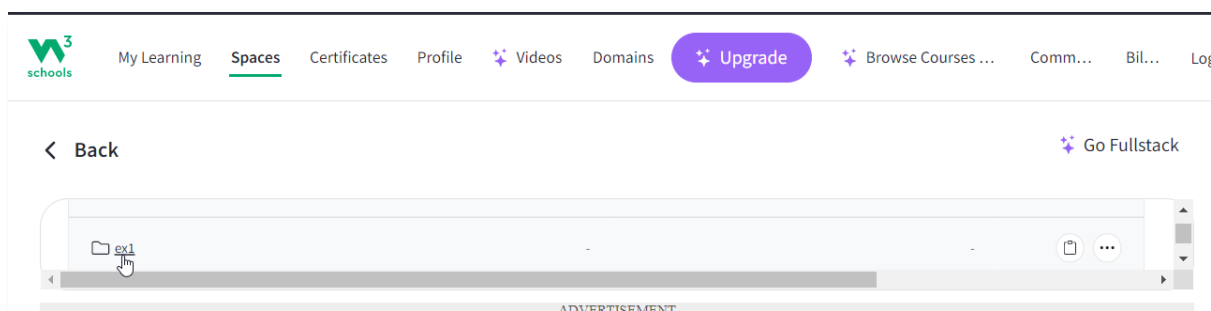

12. Now, let us create a folder (for our exercises). Click , “new folder”

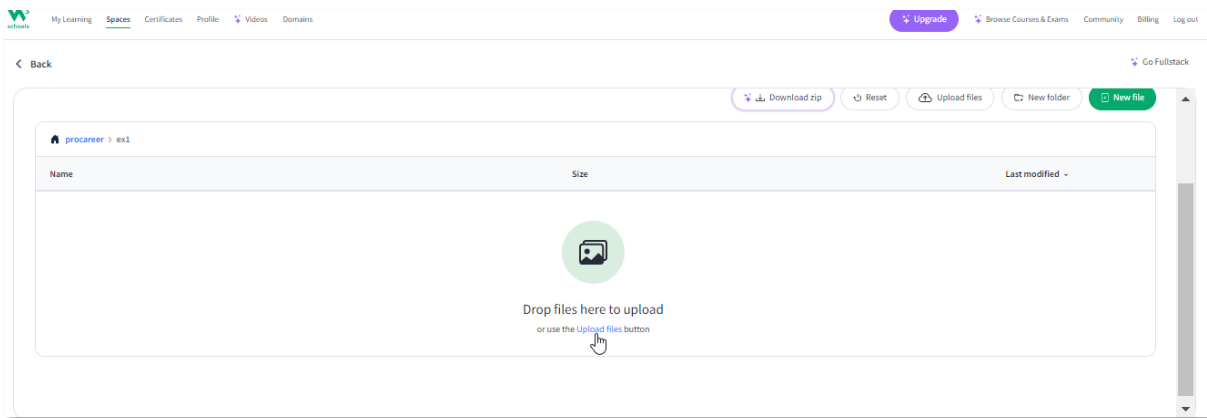

13. Name It ex1 ( for exercise1 ) and click 'Create Folder' button

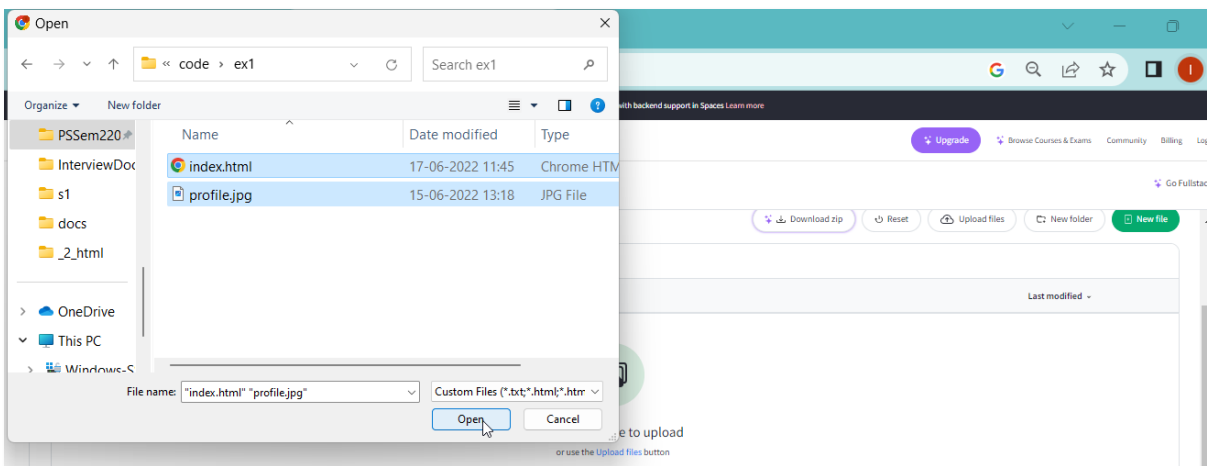

14. You should see 'your folder was successfully created'. Click on the folder name

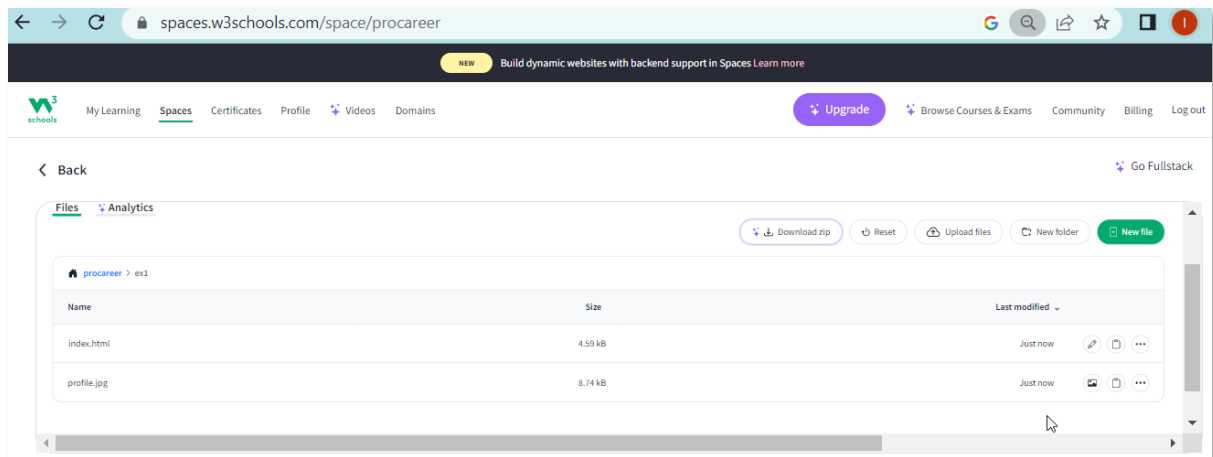

15. We can now move our files to this folder. Click on 'upload files' link

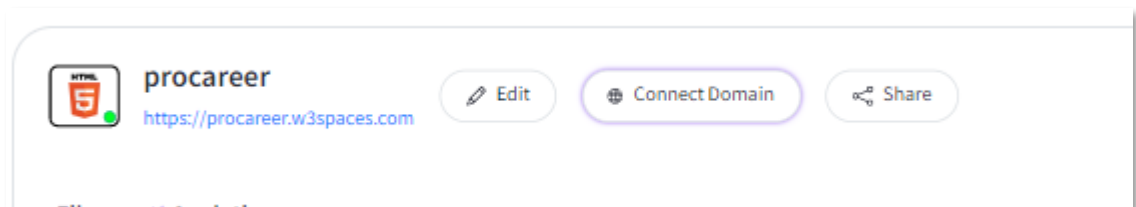

16. In the file dialog that opens, select the ex1 files (ctrl+a will select all files in the folder) and click 'open'

You should see files –

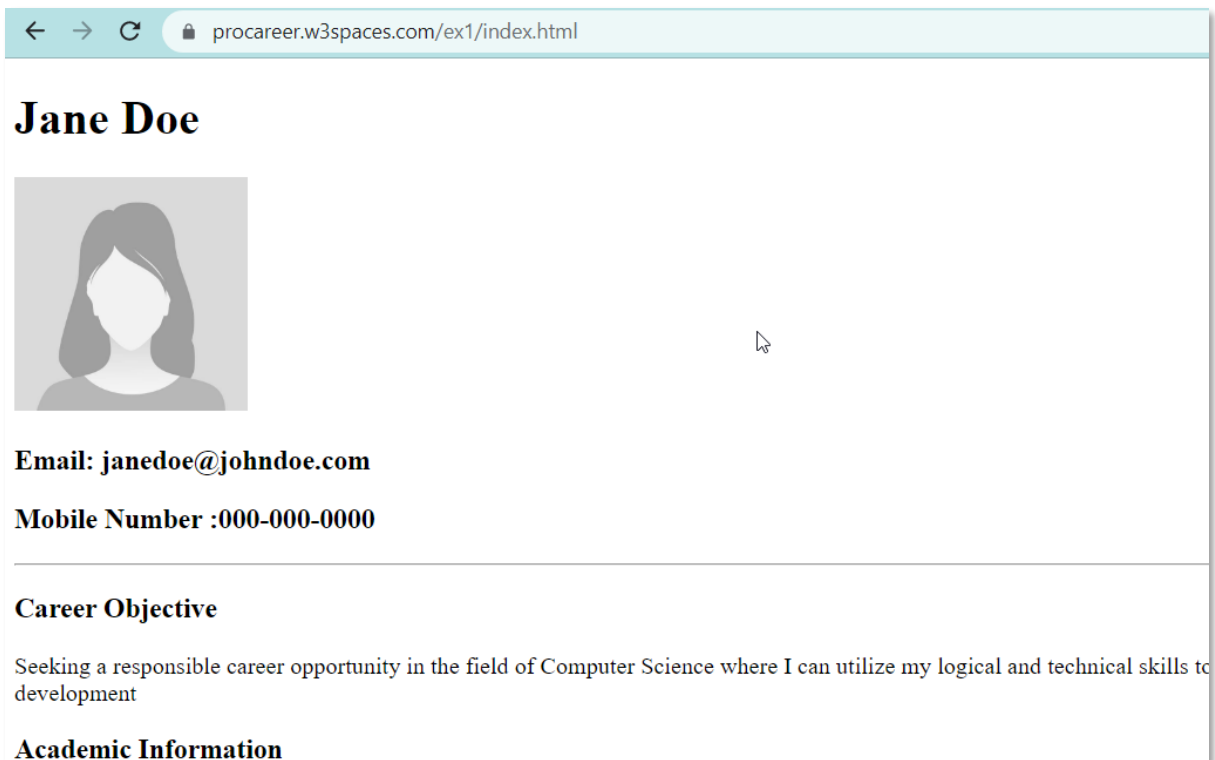

17. The link that we need to share, to show this exercise, would be ,

<https://procareer.w3spaces.com/ex1/index.html>

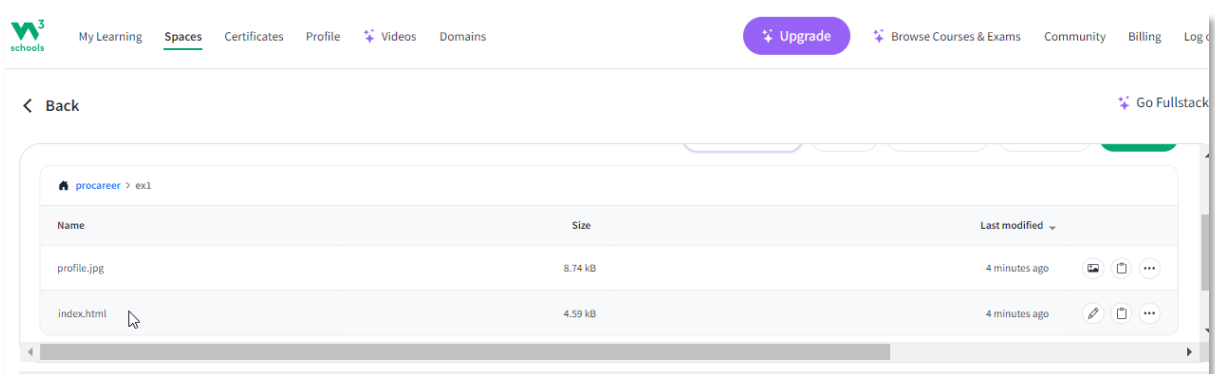

18. On launching that link , we should see the exercise page that we uploaded–

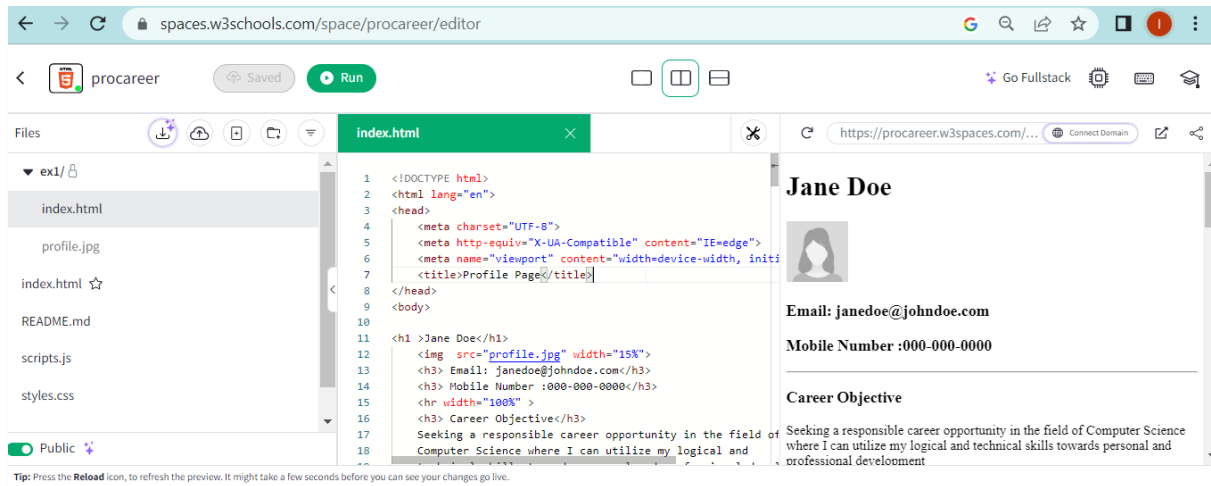

..

19. Editing the page (if need be)

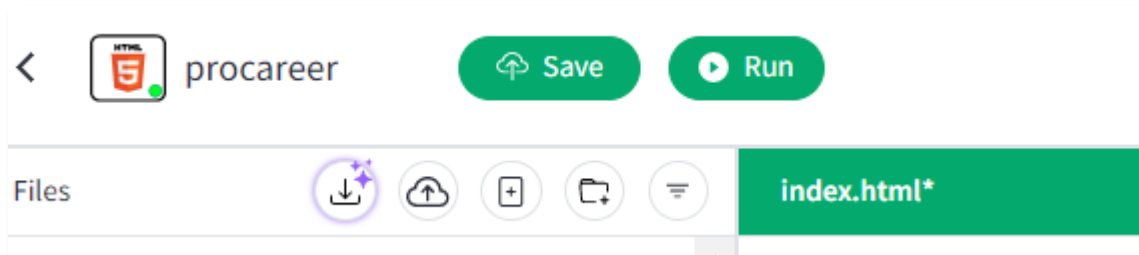

Click on the page name –

You should see the editor –

20. Can make changes and click save to save the changes. And run to see the changes

Rest all features are self-explanatory.

All the best!
