

# VS Code Installation

## About

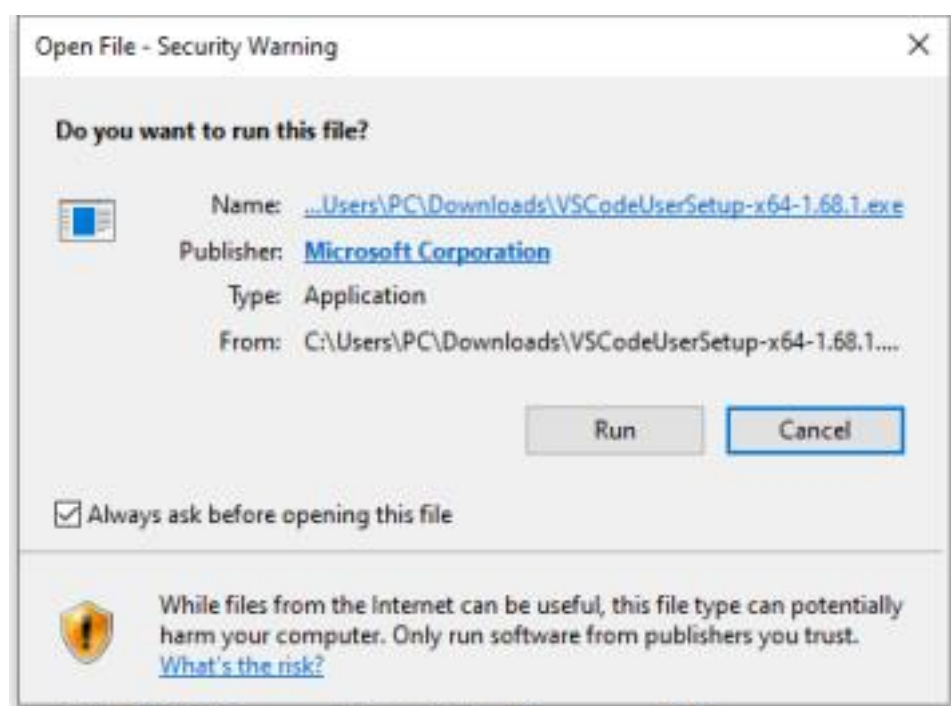

This document has the steps to install VSCode (code editor) .

**Steps** (for Windows OS, please follow the documentation at the below link for installation steps for mac)

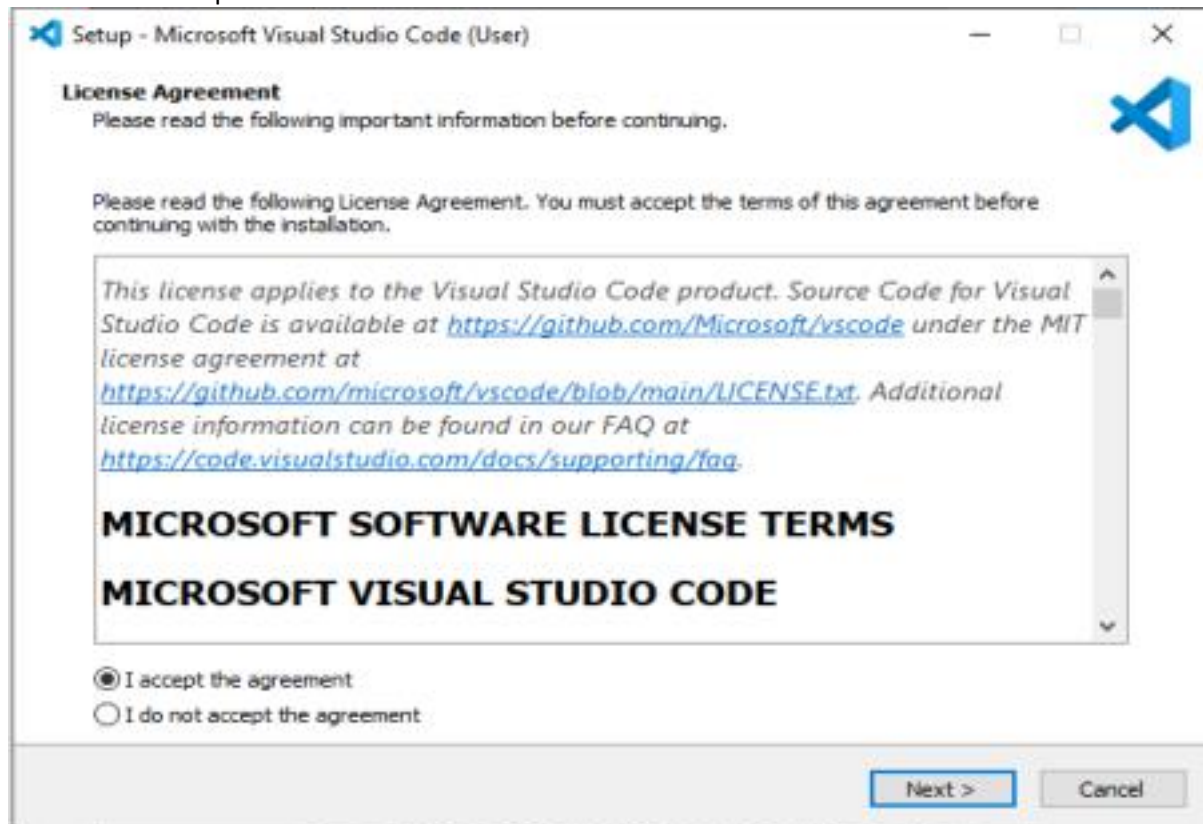

1. Launch the link - <https://code.visualstudio.com/> and download the installer file

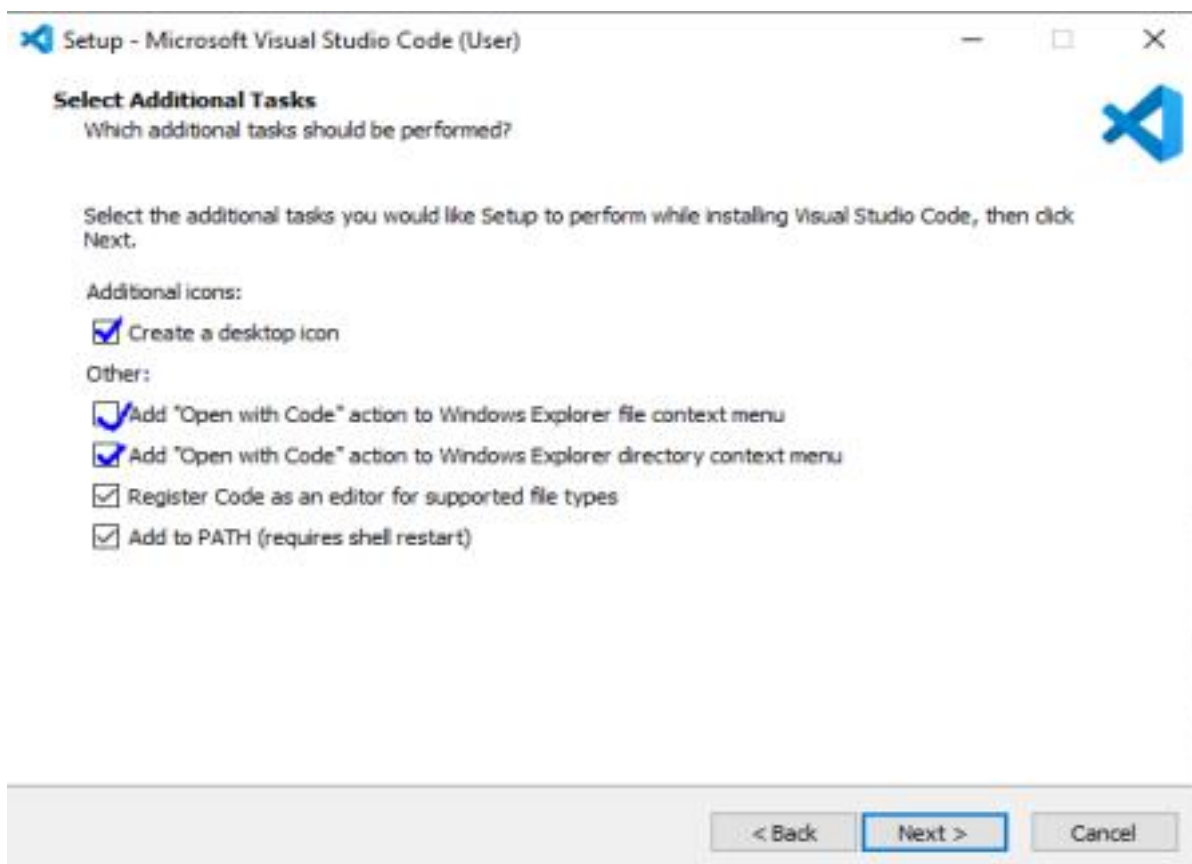

2. Double click on the file to Install VS code . Click 'Run'

3. Accept terms and click 'Next'

4. **Select All checkboxes** and click **Next** and click on **Install**

5. Click Finish and Launch VS Code.

This completes the installation. Happy coding!
